

## Hundreds of Years of Experience

AMCS Corporation's success is based on creating a team of experts drawn from the best in the industry. Each member possesses the skill, knowledge and drive to succeed. Together our team is unmatched in the industry.

At AMCS, our goal is to have the core expertise within our company to ensure the success of each project. This includes:

- **Global Reach.** Proven, demonstrated ability to execute projects anywhere in the world. Our installed project base covers 30+ countries.
- **End-to-End Project Management.** From concept through commissioning, each project is managed by adhering to time-lines, budget, and project priorities.
- **Design Innovation.** Ability to conceptualize, design, engineer, and tailor solutions to meet specific customer requirements.
- **Solution Focused.** Supporting customers with project focused teams experienced in the planning, design, engineering, and management of projects and facilities. Each project is executed to maximize plant profitability.

**Industrial Gases Technology Expertise.** AMCS staff have patented a number of process designs for industrial gas manufacturing plants. Our engineers have created many innovations in industrial gases technology. These engineers enable AMCS to provide the most cost effective standard plants along with the most customer plant solution for its clients.

## Recognized Experts

AMCS experts have developed original systems, hold patents, participate on industrial gas safety and standards panels, and are frequent presenters at industry gatherings. AMCS participates in conferences dealing with industrial gases, energy, pharmaceuticals and gasification, and is affiliated with:

- IOMA, The International Oxygen Manufacturers Association
- CGA, Compressed Gas Association
- NFPA, National Fire Protection Association
- ASME, American Society of Mechanical Engineers
- AIChE, American Institute of Chemical Engineers
- ASTM, American Society for Testing and Materials
- ASQ, American Society for Quality

Each opportunity allows our management team to work directly with our customers, bringing their unique skill sets to bear for unparalleled success.
