AMCS Corporation's fourth win as one of New Jersey's 50 Fastest Growing Companies

Bedminster, New Jersey (September 28, 2015)

AMCS Corporation, a world class process technology, equipment and services provider to the industrial gases, energy, chemicals, semiconductor, metals, and glass business sectors, has been named once again as one of New Jersey's Fifty Fastest Growing Companies. The award program produced by NJBIZ, New Jersey's premiere business news publication, is presented by Weiser Mazars and Comcast Business and sponsored by United Healthcare, and Archer & Greiner. This is the fourth time AMCS Corporation has received the prestigious award.

The NJBIZ 50 Fastest Growing Companies awards program celebrates New Jersey's most dynamic companies who progressively contribute to the success of the state's economic growth and stability. NJBIZ and the program sponsors will honor this year's fifty fastest growing companies and announce their ranking live during an awards reception and ceremony on Thursday, November 12, 2015 at the Palace at Somerset Park in Somerset, New Jersey.

"We are honored for having received once again this recognition from NJBIZ. Winning this award three times previously doesn't make winning it the fourth time any easier. Lacking the rising tide of a buoyant economy, achieving and maintaining these levels of growth gets harder every year. Our people had to innovate their way into new areas and ensure alignment with trends and new opportunities; it is the ability to see the trend from the clutter of surrounding events, willingness to take the necessary calculated risks and the ability to execute well that makes the next successful step possible. We are proud of our people; we congratulate them on this achievement. We are privileged to be part of our great state of New Jersey, a good place to raise our families, grow a business, and serve our community," said Ishmael Chalabi, President and CEO of AMCS.

AMCS Corporation supplies process plants and equipment to the industrial gases, energy, chemicals, environmental, electronics, pharmaceuticals, glass and metals market business sectors. Along with plants producing oxygen, nitrogen, argon, neon, helium, krypton, and xenon, AMCS supplies plants for high-purity electronic gases production, liquefied natural gas production, gas processing application and ship board process plants. As a full service company, AMCS has successfully executed turn-key projects in North America, Europe, South America, Australia, the Middle East and the Far East.
