Siemens National Channel Partner Meeting

Solution Partners

Lynda Pagnotta attended a Siemens symposium exclusively for strategic channel partners. The meeting is intended to be a unique and dynamic gathering of professionals including Solution Partners, Industrial Distributors and Siemens Business Management.

Attending this meeting will allow AMCS to gain a deeper understanding of the Siemens business direction in the process industry. We will continue to develop and enhance our Siemens business relationships through networking with sales management, distributors, and our fellow [Siemens Solution Partners](#). It is also important to participate in with the Solution Partner Advisory Board, and actively discuss their charter and understand their reports on recent developments and comment on opportunities for improvement in the process products and capture future concepts and directions.
