

The ULTRA-AL™ Series allows you to deliver low-cost and reliable liquid production capability into both new and expanding markets. Industry-leading design and a highly flexible product mix lets you respond to varying product demand. The ULTRA-AL™ Series even offers you the option to effectively meet demand for specialized merchant liquid plant applications such as electronic grade (PPB) requirements.

The ULTRA-AL Series® Plants Provides:

- Fully computer-automated operation
- Variable liquid mix
- Flexible product mix to meet varying product demand
- Low power-consumption design
- Simplified relocation due to modular fabrication
- Minimal footprint to fit in tight spaces
- Seismic IV/110 MPH-C design
- Built to World Standards
- On-line analyzers for continuous monitoring
- Outdoor installation saves indoor space and enhances safety

Special Options Available on the ULTRA-AL™ Series Plants

- Electronic grade (PPB)
- Remote operation-control plant functions from wherever is convenient for you
- Power tariff management
- EU/Japan/China/Australia/Canada approvals
- Extreme Climate Package for smooth operation under the most grueling conditions
- FDA compliant
- Highly automated trailer fill
- Unattended operation
- LEED Certification
- Preventive maintenance and asset management
- Automatic start-up from cold condition
- Automatic product change
